

BabyChimpGang

Banana Token

TOKENOMICS

It's time to go bananas!

Let us introduce the BCG ecosystem token. Launching on 1st of April our long awaited token will form the monetary base layer of future applications within the BCG universe.

Thinking of the perfect name for the token, it was quite obvious we only had one choice. BabyChimps love one thing more than anything - bananas. The Banana Token (\$BNA) was born.

Focusing on DeFi and GameFi applications, BNA will be distributed as rewards for those who stake, farm and play.

The following pages elaborate general information of the token, how \$BNA will be distributed and the main use cases of this token.

We, the BabyChimpGang team, are truly grateful for the progress and achievements this project made over the short period of existence. Let's take this to another step!

Hard Facts

| | |
|----------------|---------------------------------------------|
| Name: | Banana Token |
| \$Ticker: | \$BNA |
| Launch date: | 1st April 2022 |
| Total Supply: | 100 000 000 (100 M) |
| Airdrop: | Holderes of BCG, BCGX, BCGH and BCGE |
| Airdrop dates: | Quarterly: April, July, Oktober, January |

Token Distribution

The distribution of 100 M Banana Tokens can be categorized into three main sections. The smallest share is reserved for the team behind BabyChimpGang. More than a quarter of the supply will be airdropped to holders of BCG NFTs every quarter the next nine months.

The by far biggest proportion will be distributed to users of our upcoming DeFi and GameFi apps through the BCG treasury.

BCG Team:

For the multi-member team behind this project. This allocation also works as an motivation for all members to make it an ongoing success.

IMPORTANT:

Tokens are locked for 1 year!

Airdrop for NFT Holders:

Starting with the 1st of April, every quarter holders of BCG NFTs will get \$BNA airdropped, ending on 1st of January 2023. Included collections are BCG, BCGH and BCGE.*

Treasury:

The Treasury will manage most of the token supply. 10% are reserved for expenses such as marketing costs, listing fees, etc. The rest will go into upcoming DeFi and GameFi apps and will be distributed as rewards for using these services.

*This share can be lower as it depends on the amount of minted BCGE. Possible remaining funds will be allocated to treasury if not minted out.

Airdrop for NFT Holders

Starting with the 1st of April, holders of our NFTs collections will get \$BNA airdropped the same amount every quarter. (BCGX holders only one time) With this kind of distribution we want to prevent the immediate dumping of all tokens once they get airdropped. Snapshots will be taken 24H before the airdrop, which will happen at 9 P.M on the 1st of April, July, October and January.

Amount of \$BNA per BabyChimp:

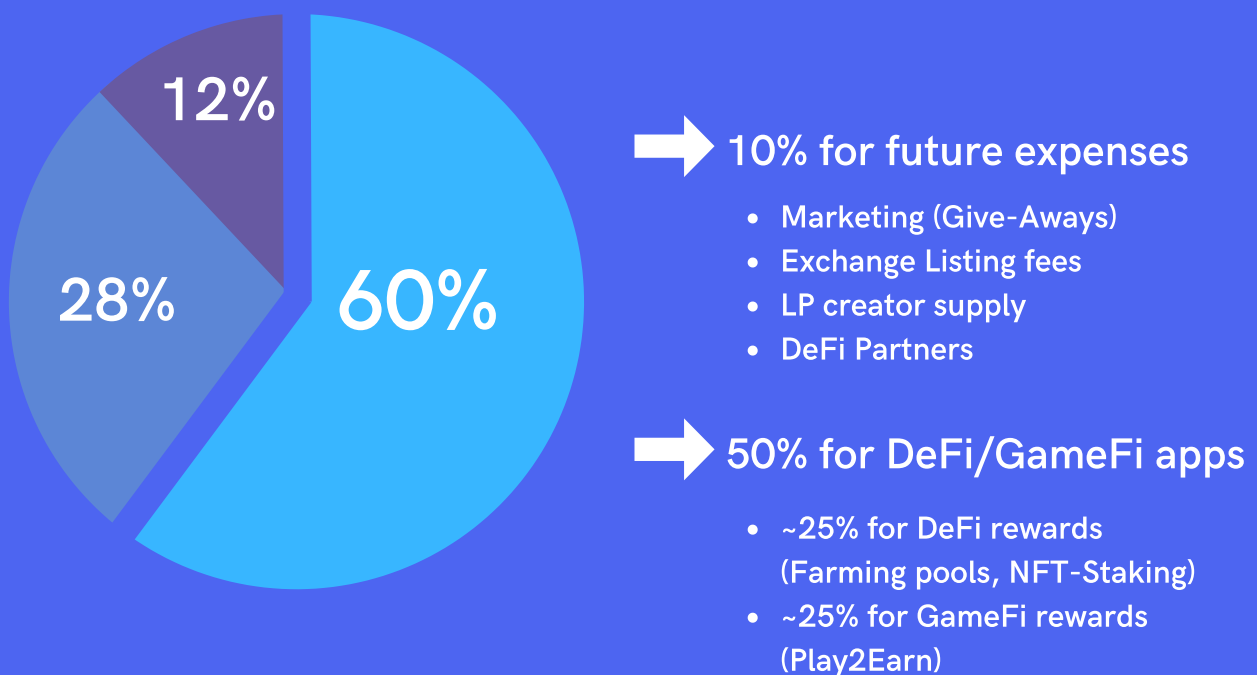

| | |
|----------------------|----------------------|
| BabyChimpGang: | 10K \$BNA (4x 2.5K) |
| BabyChimpGangXmas: | 1K \$BNA (1x 1K) |
| BabyChimpGangHeroes: | 100K \$BNA (4x 25K) |
| BabyChimpGangEvo: | 7.5K \$BNA (3x 2.5K) |

Treasury Allocation

BCG's treasury decides on 60% of the token supply. 10% is stored in the treasury and used for upcoming expenses such as marketing costs, listing fees for exchanges etc. Half of all \$BNA is distributed directly to the users of DApps. This means that the BCG team has no authority over this portion of the tokens at any time.

Emissions* of \$BNA to DeFi/GameFi:

- Emission duration: 2 years
- Emission start of LP Farming: 1st (June) or earlier
- Emission start of NFT staking: 1st (June) or earlier
- Emission start of Game rewards: 1st (August) or later

*Note: Emissions may vary due to external factors. The values given are to be understood as guide values and are not binding in any form.
